Your Technical Portal

We desire to bring new technologies and innovations to your doorstep.
FRIGONDAS is devoted to technologies aimed at improving society as a whole.
We are committed to seeing a future in which technology and society come together.

FRIGONDAS is a company that grafts everyday lifestyles together with the most cutting-edge and eco-friendly IT technologies. Our purpose is to create a more convenient, comfortable, and enjoyable environment; serving to mend the gap between generations and bring personal dreams to reality.

VISION

Building excellence with passion for a leading company

As local IT appliance industry leader and driver of changes, FRIGONDAS is ready to fight challenges with uplifting spirits to provide products capable of adding maximum value to customers and clear paths to ensure sustainability.

Growing with customers by creating value

All executives and staff members are armed with challenging and creative spirits at FRIGONDAS to bring the most out of their capabilities to become top experts in their own fields to create innovative values and growth side-by-side with customers.

Building a community of sharing through technology

FRIGONDAS shares information across its business activities and environment to all stakeholders including customers and employees expanding quality as well as quantity of public goods through activities relevant to IT business to give back to society.

Heating and Freezing at a Time!

You Can Heat and Freeze Food with a Single Product

Why we have to use a rapid cooler?

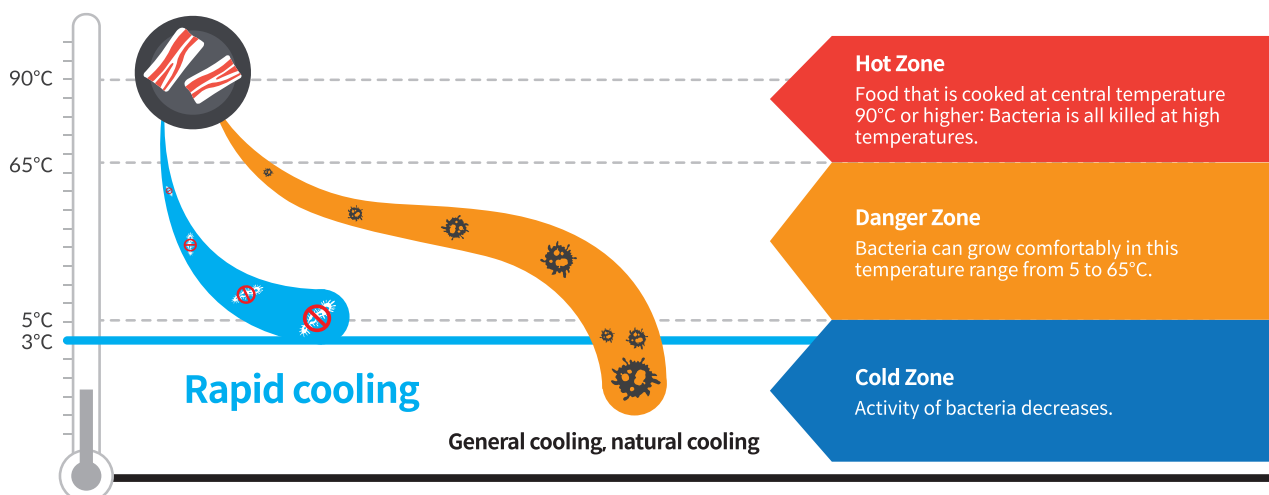

01 As food gets cold, the liquid evaporates.

02 Rapid cooling minimizes evaporation, protecting the foods flavour, shape and texture.

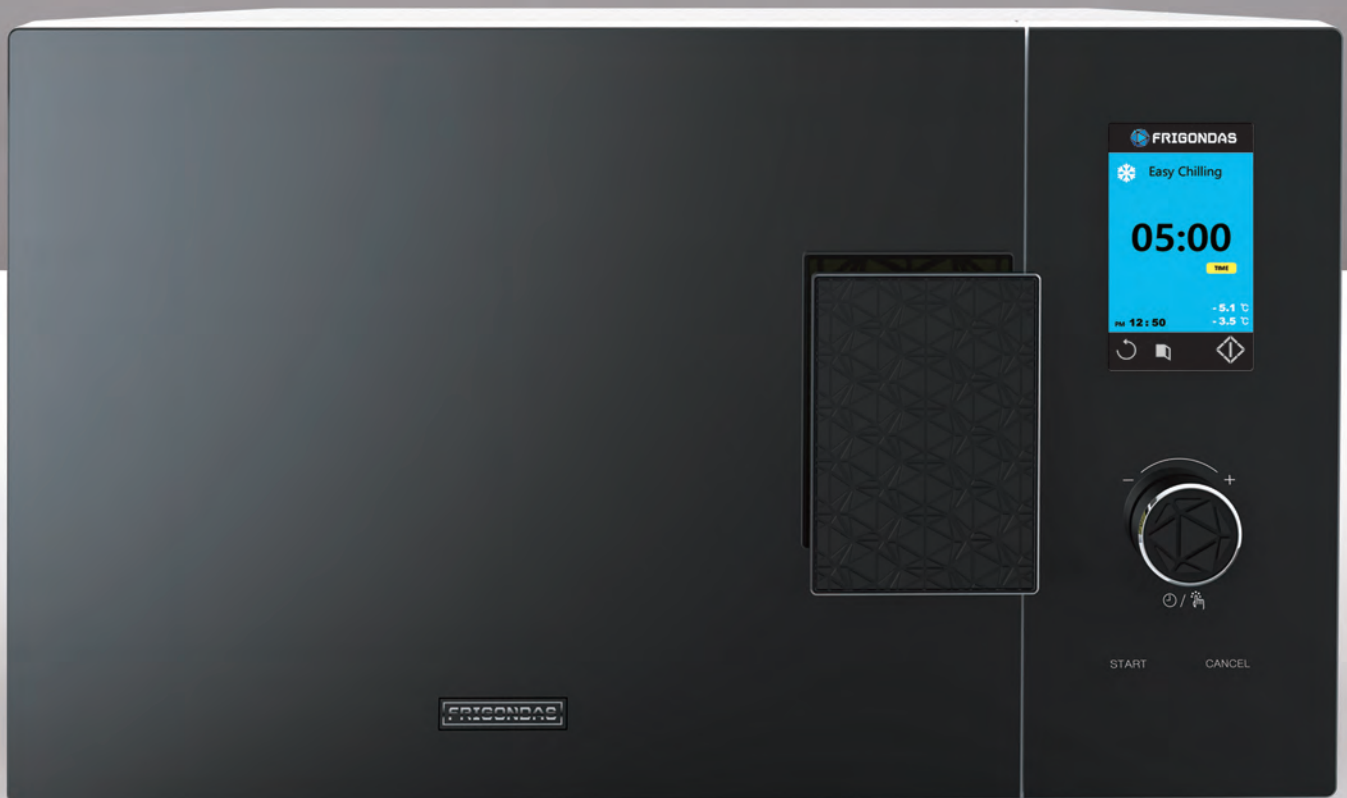

03 When food cools at room temperature, bacteria grow and multiply quickly. Rapid cooling suppresses the proliferation of bacteria, thereby enabling cooking and storage in accordance with FDA regulations.

FRIGONDAS IS AN APPLIANCE THAT COMBINES

INSTANT COOLING AND MICROWAVE TECHNOLOGY

Heating

Pre
Cooling

Drinks
Cooling

Quickly cool a beverage

You don't have to store beverages, including beer, in the fridge. Even if you keep drinks at room temperature, you could still enjoy them cool after a quick cooling at any time.

Even defrost and heat

Intense and precise heating produces a well-cooked and evenly heated dish.

SUPERPOWERFUL FAN

COOLING FAN SYSTEM (AIR BLAST FREEZING METHOD)

DUAL EVAPORATOR (CONTACT FREEZING METHOD)
